From: +JasaZ

Hi!

Elements and layouts are 80% Material elements from official Google Design documentation and guidelines <http://www.google.com/design/spec/resources/>.

Main difference from Google Design documentation is that the interface elements are summed up in one document (KIT) rather than scattered across multiple files. Google documentation is also about guidelines, this Kit is focused on UI elements for your design.

Also thanks to Taylor Ling for paving the path with .PSD Android kits. Part of them has been used as base of this project.

This is still work in progress so any suggestions please send with <http://goo.gl/F4Ud1Q> and I will add them in next release.

Document is created in MDPI resolution, so export at 216 DPI to get XHDPI png's.

(Not for sale, see credits for more)
